INTERNSHIPS

Infosys foundation | September 2025 - October 2025

- Worked on a practical, industry-oriented project under the Infosys Foundation program
- Gained hands-on experience in basic programming and technical concepts
- Improved problem-solving and logical thinking skills
- Learned real-world project workflow and professional work culture
- Developed teamwork, communication, and documentation skills

BAJAJ FINSERVE | July 2025 - August 2025

- Assisted in department/field finance, sales, operations, digital marketing.

Worked on specific tasks or projects such as preparing reports, client interaction, data analysis, documentation

Learned about industry knowledge, financial products, loan processing, customer handling

Improved skills in communication, teamwork, problem-solving

PROJECTS

Blood block management system | January 2026 - March 2026

- Developed an Android-based Blood Bank Management System to help users quickly find blood donors, blood banks, and hospitals in emergency situations. The application provides real-time information about blood availability and enables location-based search using GPS. The system allows users to register as donors or patients, search for required blood groups, and connect with nearby donors. It improves the efficiency of traditional blood bank systems by reducing manual work and saving time during critical situations.

Key Features:

User registration and login (Donor/Patient)

Search for required blood groups

Location-based search using GPS

Real-time blood availability updates

Database management of donors and blood banks

Simple and user-friendly interface

Technologies Used:

Android Studio

Java / Kotlin
Firebase / SQLite
GPS Location Services

My Role:

Worked as a Lead Developer, responsible for designing and developing the Android application, implementing core features, and integrating loca

Test management system | October 2025 - December 2025

- Project Title: Test Management System

Organization: Infosys Foundation – Patna (agar yahin kiya hai)

- Designed and developed a Test Management System to manage online tests efficiently
- Created modules for student registration, login, and test assignment
- Implemented question management, test scheduling, and result evaluation features
- Worked on system functionality, testing, and basic debugging
- Gained hands-on experience in system design, development, and documentation

AWARDS AND HONOR

- Summary
